

# SCRAP METAL DEALERS

Three scrap metal dealers that serve the Thunder Bay area have agreed to participate in our program - "Scrap is Where It's At!"

Bring your scrap metal to one of the three companies listed below for a potential cash incentive. Note: Cash for scrap is based on current "fair market value".

Call ahead to see what type of scrap items they take, what restrictions may apply and whether a cash incentive will be offered.

**Lakehead Scrap Metals**  
(Bring Your Metal Where the Money Is!)  
(Mission Island)  
305 - 106th Street  
Thunder Bay, ON, P7E 0A3  
807-623-4559  
807-623-8093 (fax)  
[lakeheadscrap.com](http://lakeheadscrap.com)

**Harbour Metals**  
(Turn Your Metal Into \$)  
(Westfort)  
700 Montreal Street  
Thunder Bay, ON P7E 6P8  
(807) 577-0873  
[harbourmetals.com](http://harbourmetals.com)

**Dutchak Recycle & Scrap Metal**  
(Cash for Scrap)  
(Intercity Area)  
705 Hammond Avenue  
Thunder Bay, ON P7B 6T5  
(877) 346-4785  
(807) 684-0544 (fax)

Office Use Only: (Tracking of tonnes collected)

--

## Scrap is Where It's At!

Recycling means taking a product or material at the end of its useful life and turning it into a usable raw material to make another product.

### FIVE REASONS WHY WE SHOULD RECYCLE:

#### Preserve our Natural Resources...

By making products from recycled material, we conserve our natural resources.

#### Conserve Energy...

Less energy is required to make recycled products.

#### Cleaner Air and Water...

Products produced from recycled materials create less air and water pollution than making products from virgin materials.

#### Less Landfill Space...

Materials that you recycle go into new products, not the landfill, so landfill space is conserved.

#### Saves Money and Creates Jobs...

The recycling process creates jobs and can put money in your pocket.

Lakehead Region Conservation Authority  
130 Conservation Road,  
P.O. Box 10427  
Thunder Bay, ON P7B 6T8

## "Take Pride in Your Property"

# SCRAP

"Protect sources of drinking water"

"Be environmentally responsible"

"Beautify the landscape"

"Cash for scrap"

\$\$\$\$\$\$\$\$

"Bring this flyer along with your scrap metal to one of the scrap metal dealers listed for a potential cash incentive."

# “Scrap Is Where It’s At”

“Scrap is Where It’s At” is a project funded through the Ontario Drinking Water Stewardship program, aimed at promoting “best management practices” to property owners as a way to further protect the sources of drinking water in the Lakehead Source Protection Area. The goal of this project is to provide information to property owners to encourage voluntary clean up of properties in an environmentally responsible manner.

## Let’s count up the number of tonnes collected!

The proper and responsible disposal of old cars, machinery and other large metal objects from local properties will reduce the potential of pollutants entering into sources of water that supply our drinking water. Whether you get your water from the City of Thunder Bay’s Municipal drinking water system, the Rosslyn Village Municipal well system or from your own private well, the responsible cleanup of properties in our watershed will go a long way towards protecting our drinking water sources, now and for years to come.

## Bring this flyer in with your scrap for a cash incentive! Call scrap dealers listed for details....

The removal and disposal of scrap metal materials from your property has the potential for cash in your pocket. Your actions provide an opportunity to clean up the environment that we live in and to beautify the landscape of our properties (rural or urban) in the watershed and you may receive “cash” for your “scrap” in the process.

Benefits of this project:

- ◇ Educate people in the watershed about proper scrap metal recycling practices.
- ◇ Voluntary cleanup of scrap metal on properties throughout the Lakehead Source Protection Area.
- ◇ Environmental benefits such as elimination of toxic effluent from old or abandoned automobiles, machinery and appliances.
- ◇ Prevent pollutants from seeping into the ground that may impact the groundwater supply of a Municipal or private well.
- ◇ Reduce or eliminate pollutants from runoff entering into surface water sources like lakes, rivers or streams.
- ◇ Reduce greenhouse gas emissions.
- ◇ Increase community pride via cleanup activities.

## Scrap Metals to Recycle

- Old and unused automobiles, farm machinery, forestry and construction equipment.
- Large appliances no longer in working condition including stoves, washers, hot water tanks and fridges. (Refrigeration appliances must have refrigerant removed and must be tagged (CFC free).)
- Old fuel and propane tanks. (Oil, gas and propane must be removed and tagged for disposal.)
- Old aluminum siding and other metal building materials.
- Other large metal items no longer in use.
- Copper, brass and aluminum scrap.

### Remember to call ahead...

**Inquire as to what types of scrap metal that local scrap metal dealers are accepting.**

**Check with a scrap dealer about a cash incentive for your scrap metal with this flyer.**

**Bins for cleanup may also be available free of charge or for a service fee.**

# Protect the sources of drinking water by being environmentally responsible!
